

IncidentXP Investigator Training, 1 day course

£670+VAT

IncidentXP is a software tool that provides a platform for conducting barrier based investigations of incidents and accidents.

It facilitates the organisation of information gathered during an investigation into a logical timeline and then structures the analysis of the event according to the identification of barrier failures. Next, the immediate and systemic causes of the failures are analysed in order to generate logical and effective recommendations to improve safety performance.

It can be used as a stand alone tool or integrates seamlessly with BowTieXP risk analysis software to establish a feedback loop between predicted performance and real world data.

Who is it for?

Any individuals conducting or overseeing serious incident or accident investigations.

This course is designed to meet the needs of those already familiar with the concepts of incident/accident investigation but want to learn how to apply a barrier based analysis approach and to use IncidentXP software.

What does the course cover?

Use IncidentXP to:

- Construct a timeline and sequence of events
- Carry out a barrier based analysis of the occurrence
- Develop recommendations and generate reports
- Create a feedback loop to BowTieXP risk assessments to improve understanding of the risk landscape

Case Study

- Runway incursion accident

'Their trainers have great experience, delivering the training to a very high standard'

UK Civil Aviation Authority

'The training we received on Risk Management, methodology and software manipulation was exemplary, allowing us to move forward using Bowtie with the understanding, knowledge and confidence that what we were doing was best practice.' **Brize Norton and 2Gp Bowtie Development Officer, RAF UK**

Anthony Venetz is a seasoned aviation professional with over 35 years of experience in operational, regulatory, and safety roles. As a commercial pilot, he has flown a diverse range of aircraft across various operating environments. In his role as an aviation risk and safety expert, he is a trusted media commentator, frequently appearing on outlets such as the BBC to provide insight into high-profile aviation incidents and accidents.

Since 2012, Anthony has been a BowTie trainer and currently serves as Co-Chair of the UK's BowTie User Group, contributing to the advancement of risk management and safety methodologies in aviation.
