

BowTie in Aviation Safety Management, 2 day course

£1050+VAT

For safe and effective decision-making, BowTie is aviation's best practice risk management tool and is used by organisations like ICAO and many regulators around the world as the preferred methodology to understand, manage and communicate safety and risk.

Packed full of examples and guided workshops, this course will equip you with all the theory and practical skills needed to confidently use and build BowTies for use within the aviation industry. You'll also gain hands on experience with the leading software platform 'BowTieXP'. The course is approved by the BowTieXP developers Wolters Kluwer Enablon.

Who is it for?

The course suits those in positions involving risk assessment and safety management, from operational roles through to senior management. No previous experience with BowTie is needed but a basic understanding of risk management principles is useful.

What does the course cover?

1. BowTie methodology:
 - Introduction to the methodology, terminology and definitions
 - Step by step guidance on building BowTies
 - Best practices as well as traps and tips advice
2. Use of the BowTieXP software:
 - How to create diagrams
 - How to customise the software to your organisation
 - How to best utilise the various diagram and report outputs
3. Building BowTie competencies:
 - Safety case study workshops exercises
4. BowTie in Safety Management System context:
 - BowTie's role within the SMS framework and ideas for practical applications
5. . Introduction to BowTie Enterprise

'Their trainers have great experience, delivering the training to a very high standard'

UK Civil Aviation Authority

'The training we received on Risk Management, methodology and software manipulation was exemplary, allowing us to move forward using Bowtie with the understanding, knowledge and confidence that what we were doing was best practice.' **Brize Norton**
and 2Gp Bowtie Development Officer, RAF UK

Workshop activities include:

1. Operational safety case - group exercise
2. Development of individual BowTie for use in your organisation

About your trainer

Anthony Venetz is an aviation professional with over 35 years of experience in operational, regulatory, and safety roles. As a commercial pilot, he has flown a diverse range of aircraft across various operating environments. As an aviation risk and safety expert, he is a trusted media commentator, frequently appearing on outlets such as the BBC to provide insight into high-profile aviation incidents and accidents.

Since 2012, Anthony has been a BowTie trainer and currently serves as Co-Chair of the UK's BowTie User Group, contributing to the advancement of risk management and safety methodologies in aviation.
