

BowTie risk & safety management in Uncrewed Aviation, 2 day course

£1099+VAT

BowTie is aviation's leading risk management tool, widely adopted by regulators worldwide to enhance safety understanding, management, and communication. Recommended for use in JARUS SORA, it serves as the ideal foundation for your Uncrewed Aviation safety management system.

This course, packed with real-world examples and guided workshops, provides both the theory and practical skills needed to confidently create and apply BowTies in the Uncrewed Aviation industry. You'll also gain hands-on experience with **BowTieXP**, the industry-leading software. Approved by its developers, **Wolters Kluwer Enablon**, this course ensures you master best practices in risk management.

Who is it for?

Designed for post holders responsible for safety management, for the development of safety risk assessments and for accountable managers. This course equips you with everything you need to implement and leverage the BowTie methodology across all key areas of your safety management processes, as well as in the preparation of high quality safety cases.

What does the course cover?

1. BowTie methodology:
 - Introduction to the methodology, terminology and definitions
 - Step by step guidance on building BowTies
 - Best practices as well as traps and tips advice
2. Use of the BowTieXP software:
 - How to create diagrams
 - How to customise the software to your organisation
 - How to best utilise the various diagram and report outputs
3. Building BowTie competencies:
 - Building UAS specific BowTies
 - Using BowTie as the foundation of a Safety Management System in the context of SORA
4. Introduction to BowTie Enterprise

'The training we received on Risk Management, methodology and software manipulation was exemplary, allowing us to move forward using Bowtie with the understanding, knowledge and confidence that what we were doing was best practice.' **Brize Norton**
and 2Gp Bowtie Development Officer, RAF UK

Workshop activities include:

1. Operational safety case - group exercise
2. Development of individual BowTie for use in your organisation

About your trainer

Anthony Venetz is an aviation professional with over 35 years of experience in operational, regulatory, and safety roles both within the crewed and uncrewed sectors. A trusted advisor to industry pioneers, a recognized authority on UAS regulations, and a frequent aviation safety media commentator, he brings unparalleled insight and real-world experience to your course.

Since 2012, Anthony has been a BowTie trainer and currently serves as Co-Chair of the UK's BowTie User Group, contributing to the advancement of risk management and safety methodologies in aviation.

'Their trainers have great experience, delivering the training to a very high standard'
